Professional Experience

Roadway Management Technologies
Software Engineer

Dec 2022 – Present

- Led the migration of a production SaaS application from Laravel to Next.js/React, collaborating with multiple teams for a seamless transition.
- Developed and implemented new features in the Next.js/React application, writing clean, efficient code to meet business requirements and improve user experience.
- Applied hotfixes and resolved escalated issues, ensuring minimal downtime and a smooth user experience.
- Managed database redesign, ensuring improved performance and scalability for a SaaS platform.
- Coordinated with product managers, front-end, back-end, and database teams to achieve project milestones.
- Created and maintained comprehensive documentation of the migration process, architectural decisions, and database structure.
- Utilized Git workflows (branching, merging, rebasing) for version control, ensuring smooth collaboration across teams.

OneTrust, LLC
Instructional Design Consultant

Jan 2020 – Jun 2022

- Integrated feedback and performance data from stakeholders to evaluate product effectiveness.
- Assisted clients in assessing project scope and drafting custom statements of work.
- Collaborated with cross-functional teams, including Legal and Security, to develop eLearning courses.

Columbia Air Force Research
Research Assistant

Jan 2019 – Jan 2020

- Created regression forecasting models to schedule preventative maintenance for aircraft.
- Performed data cleaning and preprocessing to identify appropriate predictors for the model.

JSW Law Group
Senior Paralegal

Nov 2013 – Aug 2017

- Managed 30-40 personal injury cases per month from intake to settlement.
- Negotiated settlement offers with insurance adjusters and medical providers.
- Consulted with clients to strategize case handling based on individual needs.

Education

Georgia Institute of Technology
Atlanta, GA – Dec 2019

Bachelor of Science in Industrial Engineering
